

DENNIS LEJARDI

DATA ENGINEERING MANAGER | CUSTOMER DATA & ANALYTICS ENGINEERING

Miami, FL | (786) 623-7401 | dennislejardi@gmail.com | LinkedIn

Data engineering manager leading technical delivery across enterprise customer-data and analytics platforms. Developed a three-person analyst team into data engineers while directing employee and contract engineers across architecture, code review, engineering standards, and roadmap execution. Experience spans production data architecture, ETL modernization, customer identity and MDM, data quality and observability, and governed marketing activation.

PROFESSIONAL EXPERIENCE

NORWEGIAN CRUISE LINE HOLDINGS Miami, FL	2022–Present
Manager, MarTech Data Engineering	2026–Present
Manager, Marketing Database	Apr 2024–2026
Sr. Analyst, Marketing Database	Sep 2022–Apr 2024

- Lead employee and contract engineers across customer and analytics data platforms, owning technical direction, roadmap prioritization, architecture and code review, and delivery.
- Designed and delivered a production behavioral-event pipeline using medallion modeling and incremental ingestion; benchmarked transformation materializations and validated incremental-processing correctness.
- Serve as technical release gate and QA-deployment approver for an ongoing legacy ETL modernization, reviewing design corrections and release-readiness evidence.
- Developed a team of three full-time analysts into data engineers through training in coding, dbt, data architecture, and design principles.
- Provided technical oversight of deterministic guest-identity linkage across reservation, shipboard, and CRM systems; reviewed latest-record and source-fallback logic for production customer-data workflows.
- Contribute source-system and customer-data expertise to an ongoing enterprise master data management (MDM) initiative, defining initial field scope and drafting source-priority survivorship rules.
- Coordinated cross-brand audience validation, test syncs, and operational cutover to daily automated marketing activation within an ongoing platform migration.
- Built and operate audience-specific observability digests and a self-service console combining pipeline health, data quality, and delivery signals; leadership uses the digests for operational monitoring.
- Directed adoption of AI-assisted development workflows for schema-change work.

UNIVERSITY OF MIAMI Coral Gables, FL	2021–2022
---	-----------

Technical Analyst I — Event & Conference Management Systems

- Built queries, reports, and dashboards supporting budget decisions, venue utilization, and operational analysis.

TECHNICAL SKILLS

Platforms: SQL, Snowflake, dbt, Matillion, Hightouch, Adobe Experience Platform, Salesforce Data Cloud, Streamlit, Tableau.

Data practices: Dimensional/semantic modeling, ETL/ELT, identity linkage, source survivorship, lineage and governance.

Delivery & operations: Code review, CI/CD collaboration, data quality, observability, Monte Carlo, Control-M.
