DENNIS LEJARDI

DATA ENGINEERING MANAGER | MARKETING & CUSTOMER DATA PLATFORMS

Miami, FL (open to relocation) | dennislejardi@gmail.com

linkedin.com/in/dennis-lejardi-8a352b96 | Portfolio: dennislejardi.github.io

SUMMARY

Data engineering manager who finds where data can move the business, sets the roadmap, and ships it. Lead Snowflake customer and analytics data platforms at Norwegian Cruise Line Holdings, managing 3 full-time data engineers and directing about 10 contract data engineers. Cut Snowflake compute 20% and storage 50%, led AI-assisted development that took studied development cycle times from ~5 days to ~1, and built a Snowflake marketing intelligence agent used by downstream teams.

PROFESSIONAL EXPERIENCE

NORWEGIAN CRUISE LINE HOLDINGS | Miami, FL 2022–Present

Manager, MarTech Data Engineering 2026–Present

Manager, Marketing Database Apr 2024–2026

Sr. Analyst, Marketing Database Sep 2022–Apr 2024

Promoted to manager in Apr 2024; retitled in 2026 to reflect expanded scope.

- Hired, manage, and write performance reviews for 3 full-time data engineers, developed from analysts into engineers; direct the day-to-day work of about 10 contract data engineers; own technical direction, architecture and code review, and QA and deployment approval.
- Reduced Snowflake compute consumption by 20% and storage footprint by 50% within several months by resolving high-spill queries, optimizing writes, eliminating redundant data copies, and improving data models.
- Lead ETL modernization from SAP Data Services and Informatica to dbt and Matillion on Snowflake, standardizing transformation design, development workflows, migration sequencing, and production support.
- Led department-wide adoption of AI-assisted development and QA; a vendor analysis comparing logged time on AI-assisted tickets with similar past tickets found cycles fell from ~5 days to ~1 (~2,000 hours/year projected).
- Built a Snowflake marketing intelligence agent grounded in a business ontology of concepts, rules, and metrics, used by downstream NCLH teams; built Cortex tooling for engineers to trace SQL logic, lineage, and failures.
- Designed a production behavioral-event pipeline (medallion modeling, incremental ingestion) and architected Adobe Experience Platform ingestion into governed datasets for analytics, experimentation, and activation.
- Oversaw deterministic guest-identity linkage across reservation, shipboard, and CRM systems; defined Hightouch governance and coordinated cross-brand cutover to daily automated marketing activation.
- Built Snowflake-native self-service apps for privacy requests (DSAR) and pipeline health, replacing multi-step SQL investigations; leadership uses the observability digests for operational monitoring.
- Own the data roadmap, including future data needs and tech-debt plans; proposed and designed a global marketing holdout experiment planned for 2027, and championed advanced marketing data science projects.

UNIVERSITY OF MIAMI | Coral Gables, FL 2021–2022

Technical Analyst I, Event & Conference Management Systems

PROJECTS

Pluribus | Founder & Builder Live on the App Store

- Civic-engagement mobile app for Miami-Dade residents (React Native/Expo, Supabase Postgres, PostGIS). Built GraphQL ingestion of ballot and legislative data and an incremental-sync bill importer as Supabase edge functions.

SKILLS

Data engineering: SQL, dbt, Snowflake (Cortex, Streamlit), Matillion, Git, CI/CD, Control-M, Monte Carlo, Tableau

Customer data: Hightouch, Adobe Experience Platform, Salesforce Data Cloud, identity resolution, MDM, governance

Leadership & strategy: data roadmaps, experiment design, team development, code review, AI-assisted development

Also: Python (working knowledge), React Native, Supabase/Postgres, ontologies and semantic models

STARTUP EXPERIENCE

The MVMNT | Founder & General Manager, charitable fashion startup Jun 2020–2023

Royalty & Respect Management | Director, Marketing, part-time startup alongside full-time work 2019–2022

EDUCATION

University of Miami, Frost School of Music | Bachelor of Music Business and Entertainment Industry Dec 2017
